

R. M. JONES - DECEMBER 2011

Cost Effective Winter Feeding

SUPERSTOCK Hi Pro 50

Mix with cereals for a quality finished home-mix
 High protein concentrate for lower inclusion rates and economy
 Heavily molassed meal format for palatability and no dust
 Full min-vit inclusion with extra high vitamin E
 Beef and sheep versions are available

Cereal %	95	90	85
SHP 50 %	5 (2bags/t)	10 (4 bags/t)	15 (6 bags/t)
Protein %	13	15	17
ME MJ/kgDM	12.9	12.8	12.7

We recommend a 13% protein mix for ad lib feeding systems for beef and 15% protein where the mix is restricted and forage is also fed. With cereal at £160 per tonne and Superstock 50 at £11 per bag a 15% protein/12.8 ME mix can be made for £188/tonne mix. For pregnant ewes pre-lambing we recommend a 17% protein mix is fed initially increasing to 19% protein at 2 weeks pre-lambing by the addition of Superstock Supreme Sheep 40 at 5% inclusion (2 bags/tonne) replacing cereal.

Arable News - Dates for the diary

R.M. Jones hopes that everybody has had a successful Autumn and that most of the arable work is now up to date. With winter approaching it is an ideal opportunity for us to hold our annual NRoSO meetings worth **10 CPD points**. This years topic is Water, Widgets and Wotnots. Two meetings will be held, one at The Green Farm, Felton, Hereford on **Feb 23rd** and one at Summerhill Golf Club, Clifford, Hay-on-Wye on **Feb 28th**, invites will be sent out shortly.

R.M. Jones will also hold a farmer meeting on **Feb 14th**, location to be confirmed, with guest speakers from Masstock Arable. David Neale will be discussing markets and futures, a member of the Throws Farm Research and Development team will discuss results and findings from their extensive R&D work and a member of MFC team will be discussing implications of the CAP reform.

We hope to see you there.
